## WHAT YOU WILL FIND ON THE EXPO ENERGY EFFICIENCY (EEE)

**Expo Energy Efficiency (EEE)** is a business meeting place for national and international companies involved in the field of renewable energy and LED technology, as well as a space for knowledge exchange and awareness about clean energy use.

Since 2013, **Expo Energy Efficiency**

**(EEE)** is the only platform that brings together the most important national and international companies of the field, as well as the public sector and academic field. It has established itself as the only exhibition where new technologies of renewable energy and energy efficiency have been presented.

 RENEWABLE ENERGY AND BIOENERGY  ELECTRIC VEHICLES

 NATURAL GAS  HIGH VOLTAGE POWER  ENERGY

SAVING  LED TECHNOLOGY  AUTOMATION

 ELECTRICAL MATERIALS AND SOLUTIONS  SUSTAINABLE

LEED CONSTRUCTION  INDUSTRIAL CLEANING AND RECYCLING

 ENVIRONMENT  ALUMINIUM AND GLASS

# FORO

## RENEWABLE ENERGY AND INNOVATION FOR INDUSTRY AND CITIES

In order to promote the culture of energy efficiency and raise awareness on issues of relevance the **Expo Energy Efficiency (EEE)** has the forum as a space for academic experts share experiences and projects that have been developed, as well as possibilities to develop sustainable initiatives. The **Energy Cities** forum

(2016) brought together about 30 exhibitors, with the collaboration and presence of United Nations Office for Project Services (UNOPS), University of Engineering & Technology (UTEC), A2G, Climate Change and sustainability, and Green Building Council. As well, this event had 120 attendees.

## A SPACE TO LEARN ABOUT NEW GREEN TECHNOLOGIES IN THE MARKET

During the event, **Expo Energy Efficiency (EEE)** also provides a business exchange space where companies have the opportunity to share and explain their work and development of products in the field of renewable energy. This so

they can present themselves to current and potential customers and raise awareness about their brand. In the last edition, a successful trade and promotion of green technologies and products was achieved.

## A UNIQUE PLACE TO ENTREPRENEURS BEST BUSINESSES ARE MADE WITH THE BEST PARTNERS

The **EEE VIP buyers** is an exclusive place created by **Expo Energy Efficiency (EEE)** for clients, buyers and sellers, to interact directly. It offers the best

products, of technology and services, for the greener sector of the Peruvian and international market.

## AWARD FOR TECHNOLOGICAL INNOVATION, EFFICIENT USE OF ENERGY AND ENVIRONMENTAL CARE

The second edition of the award will take place this 2017 in the **Expo Energy Efficiency (EEE)**. This award recognizes the effort of students from public and private universities of Lima that develop their capacities in technological

innovation, energy efficiency and environmental care. Also provides the opportunity to expose the young talent to different authorities from the public and private sector, and the general public.
